

## 1. Name of the product

Activity Table - Water Discovery Tubes

## 2. Product code

20222035

## 3. Brief description

Let's have even more water fun with these water pipes! Place the pipes in the rods on the base and pour water into them. Discover the water outlet in all different directions. It gives a particularly nice effect! To be used in combination with our activity table(tray) (not included)!

Size: base 84 x 11 x 3.65 cm, tube height 35, 45, 60 cm

## 4. Mounting

### Components

- 2 x small basic tubes
- 1 x large basic tube
- 9 x different tube lengths

### Tools needed

No tools needed

Small basic tubes

Large basic tube

Different tube lengths

1. Place the longest piece of base tube on the level group so that the 5 connection points point upwards.

2. Connect the 2 shorter base tube parts to the center to create a cross shape. Make sure all connection points point upwards.

3. Push the 9 tubes into the terminals and make sure that the sealed side goes into the base part. We have chosen to position them in this way, but they fit into many different patterns. Fill with water and enjoy.
