

1. Name of the product

Nenka Interactive – Rainbow Bumpas

2. Product code

20320008

3. Colour

Rainbow colours, see image.

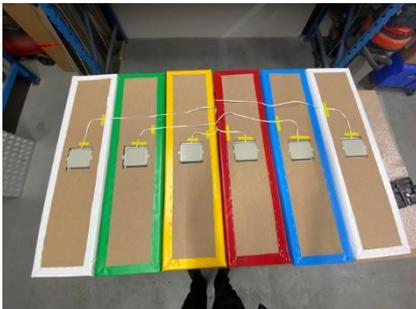

4. Brief description

An immense xylophone; Soft Play in combination with music! Coloured, entertaining, interactive and it sounds as good as it looks. The large size makes music accessible and fun to play together. The set of 6 panels can also be used as a switch. All Nenka Interactive products in the room can be changed to the same colour (colours as shown) with just one touch on a panel. Product is mounted on the wall and consists of 6 separate panels with connecting wires, a control unit and a set of speakers, both of which can be installed on a shelf or in a cabinet, for example.

5. In use

1. Guide the wires to the centre of the 6 panels, use tape to secure the wires, we recommend doing this by each panel. Pay attention doing this in the right sequence (see photo).

2. Install the panels on the wall using the mounting brackets supplied. Make sure that the wires come out in the middle at the top.

3. Take the supplied cable duct 1 of the 2 and shorten it to +/- 70 cm. Install this on the wall, centred above the panels (the wires must go through here).

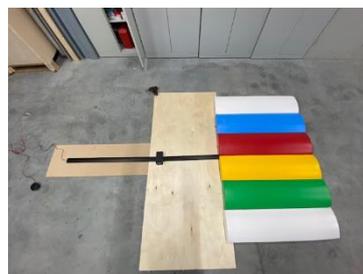

4. Connect the wires in the controller box (Black unit). Use the green terminal blocks (see photo). The wires are numbered, so connect them to the correct number. Install the controller unit on the wall.

Make sure that the cable duct falls exactly over the green terminal block.

5. Now connect the speaker wire to the unit. Use the supplied cable + speakers + 2nd cable duct. The second cable duct does not need to be shorted. Install the cable duct on the wall again, exactly so that it falls over the terminal blocks. Install the speaker exactly above the cable duct.

6. Connect the controller unit to the mains using a 12V adapter.

6. Sense Stimulations

Feel, hear, see

7. Specifications

Size: 10 x 30 x 115 cm (6x) (in total 180 cm)

Power supplies: 220 V

Set of (pieces): 6

8. Included
