

1. Productname

Bubble Tube Pump

2. Productnumber

20605960

3. Colour

As illustrated

4. Description

The water in a bubble tube should be refreshed at least once a year. This water pump is specially developed by Nenko to make filling and emptying of a bubble tube easier. The only thing you need in addition to this pump are 1 or 2 empty buckets and a power outlet nearby. Slowly lower the gray pump all the way to the bottom of the bubble tube and rest the end of the 5 meter long transparent hose in a bucket. Insert the plug into the socket, control the switch and the water pumps calmly from the bottom of the tube into the bucket. Once the bucket is full, move the end of the hose to the other bucket to fill that one up. You can empty the filled bucket of water while the other one is filling up.

5. Dimensions

Power cable: 200 cm
Transparent hose: 500 cm

5. Contents

1x Power supply with lead and plug
1x Pump with transparent hose
