Color depending on the stock.

## 4. Short description

Authentic lava lamp like this was designed in 1963. Symbolic of the 60s and still popular today. Soothing and relaxing, the lamp has an aluminum base and glass bottle hood. Only for decorative use! Works at 220 Volts. With a 35W halogen lamp. Colours can vary by availability.

## 5. Sensory stimulations

View.

## 6. Safety

Never use a lamp when the bottle has fallen, as this may have made the glass vulnerable. If you buy a replacement bottle and discard the old bottle.

If the liquid is accidentally swallowed, we advise you to

Drink. If the liquid is spilled on the skin or enters the eyes, pour cold water over it. If certain symptoms appear, we advise you to consult a doctor.

## 7. Technical information

Size: 43 cm high

## 8. Operation

The lava lamp works best after it has been used four or five times. On the first occasions, you may see small bubbles of air in the lava.

Don't leave your lava lamp on for more than 6 hours a day and make sure it doesn't get over hit. This already the life of your lamp shy. Overheating occurs when there is one big bell or a lot of small bubbles.

Never move or shake the lamp when it is on or still warm, as this can cause irreparable clouding.

Note: It is normal for the base of the lamp to become very hot.

## 9. Installation

Place the bottle on the foot with the screw cap at the top. If the bottle is not upright yet, you can turn it a little. Then plug it into the socket and turn on the lamp. Please note that it is normal for the glass to have small air bubbles and white spots.

Heating the lamp takes 1 to 3 hours, depending on the size of the model and the ambient tuning. During the warming process, stalagmite forms can occur. These will then melt and then the lava starts to flow. The warming time will be shorter, after having turned on a few of the lamp.

## 10. Additional information

Place your lamp on a flat surface in a room with a room temperature between 20 °C and 24 °C. °

Place the lamp away from:

- **Children under the age of 14:** To prevent breakage (of course the lamp can be used under supervision by younger children)
- **Sunlight:** To prevent color fading
- **Tour:** To prevent slow operation
- **Cold locations:** To avoid freezing
- **Hot locations:** to prevent heating
- **Animals:** To prevent breakage
- **Do not place the lamp on carpets and release the ventilation parts under the lamp.**
