

## 1. Product name

Tunnel with light stars

## 2. Product code

29052008

## 3. Colour

As shown

## 4. Description

Interactive sensory tunnel made of foam with a padded base.

The interior is covered with a soft fabric featuring LED lighting that is activated by touch or impact. This creates a starry effect with different sizes and intensities, with colours smoothly transitioning to provide a calming atmosphere.

160 fibre optic strands.

After 60 seconds, the lights automatically switch off until the next contact.

The high-density foam structure is strong enough to support the weight of a child.

3.7V, 450mAh,

**Dimensions:** 65 x 100 x 60 cm

**Net weight:** 5 kg

**Materials:** Polyester, PVC, flame-retardant, free from phthalates and polyurethane

## 5. Content

- 1 x LED carpet
- 1 x USB cable
- 1 x Non-replaceable rechargeable 3.7 V lithium-ion polymer battery

## 6. Getting started

### Unpacking the product:

Open the package and place the tunnel on a flat and stable surface.

### Locating the switch:

Inside the tunnel, on one side, there is a switch that allows you to turn the device on and off.

### Turning on the device:

Press the switch. If the light flashes twice, the device is switched on. If the light flashes only once, the device is switched off.

### Light activation:

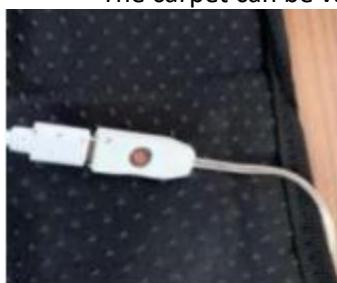

The lights are activated when hands touch the ceiling of the tunnel, creating a starry sky effect. The lights remain on for 60 seconds.

### Battery charging time:

The device takes approximately 4 hours to fully charge.

### Use Instructions

- Press the red button on the charging cable to activate the carpet. It will remain illuminated for 60 seconds.
- To reactivate: step on the carpet or press it.
- If the button is pressed a second time, the light will switch off.
- Step firmly on the carpet; it will remain illuminated for 60 seconds.
- If the carpet no longer lights up, connect the charger as described in the **Battery** section.
- Clean with a soft, slightly damp cloth.
- Do not immerse in water or wash in a washing machine.
- The carpet can be vacuumed.

## 7. Battery

- The carpet is supplied with a non-replaceable lithium-ion battery. Do not attempt to replace the battery.
- Recharge the battery by connecting the supplied micro-USB cable to an available USB port or USB charger.
- The battery is located in a pouch secured with Velcro on the edge of the carpet.
- The carpet will flash to indicate that charging is in progress. When charging is complete, the lights will turn off.
- The carpet takes approximately 4 hours to fully charge when lying flat.
- Do not leave the carpet on charge for extended periods. It is recommended to charge only when the battery is fully discharged to help preserve battery life.
