Sight

## 7. Additional Information

1. The small remote control works as it should. So all functions on the remote control work as it says, FADE, FLASH etc.
2. Briefly pressing the buttons only changes the colour of the LED Strip.
3. Long pressing of the buttons changes the colour of all Nenko Interactive products present in the room.
4. Long press of the FADE / STROBE? SMOOTH buttons ensure that all Nenko Interactive products present do this synchronized.
5. To link the 6 buttons Nenko Interactive panel, either the 'Pairing' button on the LED Strip Controller box must be pressed and held or the 'ON' button on the Infrared remote control.
