4. Brief description
The latest variant of the Time Timer, see here the durable, portable Time-Timer MOD.
The Time Timer MOD is a commonly used clock in people with ADHD, autism or Dementia.
This timer is ideal for on your desk or counter. In addition, the clock is also ideal for use in the classroom or in a meeting.

The Time Timer MOD is protected with a Gray case and a clear plastic lens to protect the red disk. Because the Time Timer is small in size, it is easy to take with you to work or school. It is also possible to adjust the sound yourself, making the clock extremely suitable for use in noise-sensitive areas. It is also possible to turn off the sound completely.

5. In use
1. The Time Timer MOD runs on 1 AA alkaline battery – High power (not included).
2. The Time Timer MOD has a battery door on the back.
3. To set The Time Timer MOD, move the disc counter-clockwise to the desired time. The disc disappears clockwise as time passes.
4. The disc can be rotated to any point on the timer. The timer is always on and does not need to be turned on or off. The disc can be moved back and forth (clockwise or anti-clockwise) without damaging the mechanism. Of course, careful handling extends the life of the Time Timer MOD. The sound switch on the back with on/off can be switched on or off.

6. Size
9 x 9 x 5 centimetres
121 grams

7. Delivery
Without 1 AA battery
